

Sanne Lindholm

Junior Full Stack Developer

Newly graduated from Craft Academy where I have been working in a fast-paced environment, learning how to work in real-life projects and situations. I got a solid knowledge of working with both front end and back end to build complete full stack applications, all based on the Agile methodology, Test-Driven Development process and pair programming.

TECHNICAL SKILLS

PREVIOUS PROJECTS

TuneShare (01/2021 - 02/2021)

- Developed a mobile application for users to post a song along with a description, interact with other users and listen to a 30 sec preview of the songs. Also created a RESTful back-end server to provide users with music data retrieved from the Spotify API.
- Built using Expo, React Native, Redux, Ruby on Rails, RSpotify, Devise Token Auth, and tested with RSpec, Cypress and Jest.

Kitty News (12/2020 - 01/2021)

- Developed three different applications: user, admin and mobile which were all being dealt with a single API. On the admin client journalists could authorize and create articles that visitors and users could read on the user and mobile clients.
- Built using React, Expo, React Native, Redux, i18next, Ruby on Rails, Axios, Stripe, Devise Token Auth, AWS and tested with Cypress and RSpec.

Trumpster (12/2020 - 12/2020)

- Developed a web application for users to register and subscribe to get different feature access.
- Built using React, Axios, Ruby on Rails, Stripe and tested with Cypress and RSpec.

Revisarik Online Pizzeria (12/2020 - 12/2020)

- Developed a web application for users to order food and a RESTful back-end server for handling user data, products and orders.
- Built using React, Redux, Ruby on Rails, Stripe, Devise Token Auth and tested with Cypress and RSpec.

Rock Paper Scissors (11/2020 - 11/2020)

- Developed a web application of the popular game Rock Paper Scissors which could be played between the user and the computer.
- Built using React and tested with Cypress.
